Hence ME. *clāthe*, *clothe* (the former retained in north dial.), inflected *clathed*, *clothed*. *β.* OE. *cláðan*, with pa. t. *cláðde*, **clædde*, whence ME. *cladde*, *clad*, and prob. the northern type *clethe*, *cledde*, *cled* (formerly referred to Norse *klæða*): see CLEAD. [The original plural of CLOTH:—OE. *clá-ðas*, ME. *clō-thes*; the *ō* remaining in the (originally) open syllable, and the þ becoming ð between vowels, as in *clothe* vb., *clothing*, etc., and subsequently changing final *s* to *z*: cf. *truth*, *truths*, *staff*, *staves*, etc. As the singular *cloth* is not now used in the sense of 'a garment', and has received a new plural *cloths* for its extant sense, *clothes* remains a collective plural, without a singular; to express the latter, a phrase, such as 'article of clothing', or another word, such as 'garment', is used.

The distinction *cloths*, *clothes*, is chiefly of the 19th c. The ordinary 18th c. spelling was *cloaths* (pronounced with ð), as in *cloath* = CLOTHE vb.

Almost immediately after the reduction of the ME. dissyllabic form to one syllable, by change of *-es* to *-s*, the ð began to disappear in pronunciation in all the dialect types, as shown by the spellings *close*, *cloes*, etc. (from *clothes*), *clase*, *clais(e*, *claes*, etc. (from north. *clathes*), *clese* (from *clethes*). These forms are still dialectal, and *close* (klǝuz) is frequent as a vulgar or careless pronunciation of *clothes*. All these phenomena are paralleled in other Germanic dialects, e.g. MHG. *kleit*, pl. *kleider*, MDu. *cleet*, pl. *clêde*, EFris. *klêd*, pl. *klêr* (for *klêder*), WFris. *klaed*, pl. *klean*, NFris. *klâid*, pl. *klûe*, Saterland *klâth*, pl. *klôder*, Wangeroog *klêt*, pl. *klôder*.

The Lancashire pronunciation *cloof* (cf. *enoof* = *enough*) has given rise to an erroneous notion that this word is related to Icel. *klofi* or Du. *kloof* 'cleft, rift', with which it cannot possibly have connexion. The phonetic history and dialect forms clearly show that it is parallel to *bough*, *enough*, *plough*, *tough*, etc., from OE. *-óh*. That *clóh* existed in OE. is also shown by the numerous ancient proper names in *Clough-*, *-clough*, *-cleuch*. The parallel OHG. *klâh* in *Klâhuelde* (Foerstemann II. 371) confirms the view of the Rev. A. L. Mayhew (*Academy*, 31 Aug., 7 & 21 Sept. 1889) that OE. **clóh* represented an OTeut. **klâh-* from *klanχo-*, and thus stood in ablaut-relation to Ger. *klinge*, OHG. *chlingo*, a clough (pre-Teut. root **glenk-*); cf. The OE. points to an OTeut. **klûto-z*, pre-Teut. type **glū'do-s* from same root as CLOT, CLEAT (:—**glu'dom*, **'glaudom*). The original sense would therefore be something like 'lump, piece of stuff'; from an early period the word has been applied especially to a patch or piece of cloth, and so to *a cloth* (CLOTH 1–3) in a somewhat depreciatory sense. But sense 2 retains some of the original wider meaning, and relationship with CLEAT. It has been doubted whether sense 7 belongs to this word, though a parallel development of sense is found under CLOD.]

The phonetic history of the word in English contains points of difficulty. Originally *clowe*, *cloue* was, like the Fr., undoubtedly (klu:), which would in due course have become *clow*. It is surmised that in the 15–16th c. spelling *cloue*, *u* was taken to mean *v*, as in *moue*, *loue*, etc. (cf. APPROVE *v.*[2]); but it is not known how such a change in the spoken word occurred as to give the modern pronunciation, which is perh. already indicated by the 15th c. spelling *cloyfe* (= *clōve*), is suggested by the pl. *close* in 1555, and is implied in the Shaks. quot. of 1588.]

clow (klaʊ), *sb.*[1] Forms: *α.* 3 (*dative*) cluse, 5-6 clowse, clowze, clouse, *pl.* clousis, clowses, 9 *dial.* cloose. *β. pl.* 5 clowys, 6- clowes, 9 cloughs; *sing.* 5 clowe, 7-9 clow, 8-9 clough; *dial.* clow, clew. [*Clow* is a false singular formed upon *clowes*, *clowis*, taken in 15-16th c. for a plural, but originally a singular, in ME. *clowse*, *clowze*, early ME. *cluse*, OE. *clúse*, a. late L. *clūsa*, var. of *clausa*, lit. a closed or shut place or way. Du Cange has, among other senses, 'agger in quo concluduntur aquæ'. Hence, also, OHG. *chlûsa*, MHG. *klûse*, *klûs*, mod.Ger. *klause*, in Bavaria and Tirôl, a dam on a mountain stream for floating timber; *klaus*, in Rhineland, a mill-dam, also dial. a sluice. So MDu. *clûse*, Du. *kluis*.

The OE. *clús*, *clúse*, is recorded in the senses 'enclosure', 'narrow pass', but not in that of 'dam', 'lock', or 'sluice', though 'dam' appears already in Ancren Riwle in 13th c. In the 18th c. *clow* began to be erroneously spelt *clough*, by engineers, etc., either through erroneous identification with CLOUGH *sb.* 'ravine', or by association with *plow*, *plough*. In some of the dialect glossaries it is spelt *clew*, meaning (klu:). An unexplained *clowre*, *cloor*, is found in Catholicon Anglicum, and northern dialects.

A compound of L. *clūsa* was *exclūsa* (in Gregory of Tours; in med.L. *sclūsa*, *slūsa*), giving OF. *escluse*, F. *écluse*. Hence Sc. CLUSS, *clush*; OF. gave MDu. *sluyse*, Du. *sluys*, whence Eng. *sluice*, LG. *slüse*, Ger. *schleuse*. Thus *clows* and *sluice* are ultimately closely related.]

clown (klaʊn), *sb.* Also 6 cloune, cloine, cloyne. [Appears in Eng. in second half of 16th c. as *cloyne* or *cloine*, and *clowne*. The phonetic relation between these is difficult to understand; the former is esp. obscure: possibly a dialect form. By Dunbar, the word (if indeed the same) is written *cloun*; but it rimes with *tone*, *Joun*, meaning *tune*, *June*, both having in Sc. the sound (ʏ or ø), which would imply (klʏn). Words identical or closely related appear in several of the cognate langs. and dialects: *e.g.* NFris. (Moringer dial.) '*klönne* (or *klünne*) 'clumsy lout, lumpish fellow' (Bendsen) :—OFris. type **klunda* wk. masc. Cf. NFris. insular dial. Amrum *klünj* (pl. *klünjar*) 'clod, clot, lump' = Sylt *klünd* 'clog, wooden mall':—OFris. type **klund* str. masc. Also mod.Icel. *klunni*:—**klunpi* 'clumsy boorish fellow' (Vigf.), 'en klods, ubehændig person' (Jonson), compared with Sw. dial. *klunn*, *kluns* (Rietz) 'clump, clog, log', and Da. dial. *klunds* = *klods* 'block, log, stump', also 'clown'. In Dutch also, Sewell (1766) has *kleun* fem. (marked as a 'low word') 'a hoidon or lusty bouncing girl', *kloen* n. with same sense; and he explains Eng. *clown* as 'een plompe boer, kinkel, *kloen*'. Bilderdijk *Verklarende Geslachtlijst* (1832) says that *kloen* applied to a man signifies *een lompert*, 'clown' in English, and so is it with *klont*, *kluit*, and *kluts* or *klots*, all meaning primarily 'clod, clot, lump'. So far as concerns the sense-development, then, it is clear that we have here a word meaning originally 'clod, clot, lump', which like these words themselves (see CLOD 5, CLOT 4), has been applied in various langs. to a clumsy boor, a lout. Of an OE. type, corresp. to the Fris., or to the Du. words, we have no trace, no more than of the occurrence in Eng. of the primitive sense 'clod'; and it is probable that in Eng. the word is of later introduction from some Low German source.]

Phonetically, *cloyne* answers exactly to OF. *cluigner, clugner* var. of *cligner* 'to bring together the upper and lower eyelids so as to leave a very small interval between them,' often to 'wink', as the expression of secret understanding, cunning, or hypocrisy, as in 'clignement d'œil, œil d'hypocrite' (Paré, 16th c., in Littré). From this to our sense 1 appears to be an easy transition. (Cf. the history of *connive.*)]

III. A combination, association.

[This group of senses is closely connected with the vb.; but the evidence does not make certain what was the exact course of development. In particular, it does not appear whether a *club* in senses 13–15 was, in its origin, merely a knot or association of persons, or a 'clubbing' of the expenses of an entertainment, or of contributions towards it: see the verb senses 4–10, where the earliest example quoted (in 9) is connected with the joint defrayal of expenses. The order here followed is therefore merely provisional.]

13. a. An association or society of persons of like sympathies, of a common vocation, or otherwise mutually acceptable, meeting periodically (under certain regulations) at some house of entertainment, for social intercourse and cooperation.

As to 'clubs' in this sense, which were a great feature of English life in the 18th c., see the Spectator 1721 No. 9. Associations of this sort still exist under the name; but, speaking generally, the 17–18th c. 'club' has developed in two directions; that mainly connected with entertainment having become a permanent institution as described in sense 15, while the occasionally or periodically meeting club has usually primary objects apart from conviviality, as in 14. (The first quotation may belong to sense 12.)

Many of these are solely devoted to the object for which they are organized; others combine therewith some of the convivial features of sense 13, or even the permanent organization of sense 15. Here belong the publishing clubs, as the Abbotsford, Bannatyne, Roxburgh, Spalding, etc., which differ from *societies* with similar objects chiefly in their limitation of membership to a fixed number.

15. a. An association of persons (admittance into which is usually guarded by ballot), formed mainly for social purposes, and having a building (or part of one) appropriated to the exclusive use of the members, and always open to them as a place of resort, or, in some cases, of temporary residence; the club may be political, literary, military, etc., according to the aims and occupations of its members, but its main feature is to provide a place of resort, social intercourse, and entertainment.

This is a natural development of the club of sense 13, which gradually grew till it monopolized the whole accommodation of the tavern or house at which it met, and the place became known as a 'club-house',—the club often bearing the name of the proprietor of the house. Later, in order to have the management of the house and their affairs in their own hands, some clubs started fully-equipped establishments of their own. The institution has developed into its most completely-organized form in London, where, especially in the vicinity of St. James's (colloquially called 'clubland'), are to be found the most perfect types of it.

1776 WALPOLE *Jrnl. Reign Geo. III* (1859) II. 39 Being excluded from the fashionable club of young men at Almack's they formed a plan for a new club..They built a magnificent house in St. James's Street and furnished it gorgeously. **1823** BYRON *Let. clump (klʌmp), *sb.* [Known since end of 16th c. Agrees in form and meaning with LG. *klump*, MLG. *klumpe* (whence also mod.G. *klumpe(n)*, Du. *klomp*, MDu. *clompe*, lump, mass. Cf. OE. *clympre*, CLUMPER. There is no evidence to show whether the English goes back with these to OLG. or WGer., or is of later adoption from LG. The stem *klump-* appears in ON. with another grade of the labial as *klumb-*, whence *klumba, klubba,* CLUB.

In sense 4 it is immediately derived from MDu. and MLG. *clumpe, klumpe*, Du. *klomp* a wooden shoe, i.e. a shoe entirely shaped out of a lump of wood (as worn by the North German peasantry); which is a special application of the Du. and LG. word as given above. Although, therefore, this use has not been developed in English from the radical sense, it may be treated as belonging to the same word, esp. as there is a general association of meaning: cf. also CLUMP *v.*

Klumb- was probably a nasalized form of **klub-*; comparing this with the stem *kulb-* of OHG. *cholbo*, OLG. **kolba* (MLG. and MDu. *colve*, Du. *kolf* 'club'), and ON. *kolfr* javelin, *kylfi, kylfa* 'knot, club', we are led to a pre-Teut. **glbh*, whence app. L. *globus* rounded mass, ball.]

clutch (klʌtʃ), *sb.*[1] Forms: α. 3-6 cloke, β. *Sc.* 4- cluke, (5 clucke, 5- cluik, 7-8 clook, 8- cleuk). γ. 3-6 cloche, 6-7 clooch. δ. 5-6 clowch(e, 6-7 clouche, cloutch, 7 clowtch. ε. 7- clutch. [A word, or train of words, of difficult history. The earliest form exemplified is ME. *clōke*, Sc. *clūke*, of which the normal modern form would be *clook*. Of this, ME. *clōche*, 17th c. *clooch* (rime *brooch*), appears to be a palatalized southern form; but the conditions of the origin of this and *clowtch*, *clouch* (rime *pouch*), are obscure. *Clutch*, which since the 17th c. has superseded the other forms (exc. dial. *cloke*, *clook*, *cluke*), came in apparently from the verb CLUTCH, q.v. It is to be noticed that with the obsolescence of the earlier forms, the original literal sense of 'claw' also disappeared, and the senses now in use are mainly those of a noun of action from the verb.

For ME. *clōk(e*, normally we should expect an OE. **clóc*, *clóce*. But, as under BROOK *v.* we see a ME. *brōke* (beside *brouk*), from OE. *brúcan*, so here, ME. *clōke* (? beside **clouke*) may represent an OE. **clúc* or *clúce*. This would represent an OTeut. **klûka-* or *klûkôn-*, a deriv. of the vb. root **kluk-*, *kleuk-*, whence came **klukjan*, OE. *clycc(e)an*, CLITCH, CLUTCH. Thus *clōke* would be ultimately related to these verbs. As we cannot on any phonetic principles explain the palatalized forms *clōche*, *clooch*, *cloutch*, it seems probable that these were produced by the influence of the vb. *clucche*, *clutch*, upon the sb. *clōke*, **clouk*, and that the sb. was thus brought gradually in form and sense into direct identification with the verb, as we see, under the verb, that the latter has also been brought in sense into closer association with the sb.]

In sense 1 the word was evidently a phonetic variant of CLOTTER, from CLOT (which had occas. the form *clut*). Afterwards, influenced perh. by association with *cluster*, it was taken to mean 'an assemblage, crowd, medley'; and still later, perh. by association with *clatter*, the notion of noise entered in, so as to give the sense of mingled and confused noise (cf. EFris. *klöter* a rattle, *klötern* to rattle).]

co, dial. form of COME *v.*

co-, *prefix* of Latin origin. In Latin the preposition *com-* (which as a separate word was written in classical L. *cum*) was shortened to *co-* before vowels and *h*, also before *gn-*, e.g. *coalescere*, *coercēre*, *coortus cohærēre*, *cognātus*. Partly from the greater syllabic distinctness of this form of the prefix, arising out of the natural break between it and the following vowel, whereby also, on the break-down of the older quantitative system, the *o* became a long vowel, partly from the readiness with which some compounds of this type, as *co-æquālis*, *co-adjūtor*, *co-episcopus*, *co-hæres*, *co-operātor*, *co-optāre*, were analysed into their elements, *co-* has come in English to be a living formative, the use of which is no longer restricted to words beginning with a vowel, but extended to all words of analogous kinds, including native English or other words, as well as those from Latin. The general sense is 'together', 'in company', 'in common', 'joint, -ly', 'equal, -ly', 'reciprocally', 'mutually'. It combines (like L. *com-*, *con-*, *co-*) with verbs, adjs., adverbs, and sbs. It is sometimes prefixed to words of L. origin which are already compounded with *com-* (*con-*), as *co-connexion*, *-conspirator*, *-constituent*.
It occurs also as a variant form of words of L. origin or type, where the regular form is *com-*, *con-*, *cor-*: e.g. *co-centric*, *co-natural*, *co-numerary*, †*co-partment*, *co-relation*, *co-rival*, *co-temporary*, *co-terminous*, and other occasional instances: cf. also *co-citizen*, *co-join*, *co-mingle*, with *concitizen*, *conjoin*, *commingle*, etc.
All the more important of these compounds appear in their alphabetical order as Main words: there follow here examples of compounds of rare occurrence and obvious meaning, or in which the combination is but for the nonce. It is notable how many of these are solely due to Bishop Ken.

coach (kəʊtʃ), *sb.* Forms: 6 cochee, (coch, coyche, cosche), 6–7 coche, coatch(e, 6– coach. [In 16th c. *coche*, a. F. *coche* (masc., in 16th c. occas. fem.). Found since 16th c. in nearly all European langs.: cf. Sp. and Pg. *coche*, It. *cocchio*, Wallachian *cocie*; Ger. *kutsche* (in 16th c. also *kotsche*), Du. *koets*; Boh. *koč*. Pol. *kocz*, etc. All originally from Magyar *kocsi*, formerly also written *kotsi*, (pronounced kɔtʃi), 'ungaricum currum [quem] kotczi vulgo vocant' (anno 1560), used in Hungary from the reign of King Matthias Corvinus, 1458–90. *Kocsi* is in form an adjective, meaning app. 'of Kocs (kɔtʃ)' a place south of Komorn, between Raab and Buda; the full original name (still used in 18th century) being *kocsi szeker* i.e. 'Kocs cart' (car, wagon), rendered in Lat. in 1499 *cocius currus*, in 1526 *currus kotsi*. Hence, also, the early equivalents in other langs.: Boh. *kočí vůz* (Kotsh car), shortened to *kočí*, *koč*; Ger. 16th c. *cotschie-* or *cotschy wagen*, *cotzie wagen*, *gotschiwagen*, *gutschiwagen*, shortened to *gotschi*, *gutschi*, *gutsche*, *kotsche*, *kutze*, *kutsche*; earlier Du. *kotsie-*, *koetsie-*, *koets-waghen*, shortened to *kotsie* (Kilian), *koetsie*, *koets*. Cf. also 16th c. Eng. *cochee*. The Sp., Pg. and F. *coche*, were app. immediately from 16th c. Ger. *kotsche*.

See full historical details collected by Hildebrand in Grimm, s.v. *Kutsche*.]

1. a. A large kind of carriage: in 16th and 17th centuries, usually a state carriage of royalty or people of quality (still occasionally used, as *e.g.* the Lord Mayor's coach); now, usually, a large close carriage with four wheels, with seats inside, and several outside, used for public conveyance of passengers (see STAGE-COACH). Hence *to take coach* (obs.).

It does not appear certain what was the precise new feature that distinguished the Hungarian *kocsi*, and led to its adoption throughout Europe. A German picture of 'ein ungerische gutsche,' after 1550, shows it still without covering, and not suspended on springs. (Hildebrand in Grimm.)

coarse (kɔɔs), *a.* Forms: 5 cors, corse, 6 cours, cowrse, (cowarce), 6–8 course, 7 coorse, 7– coarse. [First found early in 15th c. No corresp. adj. in Teutonic, Romanic, or Celtic. The general spelling down to the 18th c. was identical with that of the sb. COURSE; with that word it is still identical in pronunciation, both in standard English and in the dialects (*e.g.* Scotch kurs); the spelling *coarse* appears to have come in about the time when the pronunciation of *course* changed from (u), to (o). Hence the suggestion of Wedgwood that *coarse* is really an adj. use of *course*, with the sense 'ordinary', as in the expression *of course*, 'of the usual order'. It appears to have been used first in reference to cloth, to distinguish that made or worn in ordinary course from fine cloth or clothes for special occasions or special persons; 'course cloth' would thus be 'cloth of (ordinary) course'. Cf. the history of *mean*, and such expressions as 'a very ordinary-looking woman', a 'plain person'.

Our first contemporary example of the spelling *coarse* is in Walton 1653 (where *course* however also occurs; it became frequent after 1700; *course* occurs occasionally down to 1800.]

cob (kɒb), *sb.*¹ Also 5–6 cobbe. [Used in a number of senses having but little apparent connexion with each other, and possibly of diverse origin. The notions may be roughly distinguished of 'something big or stout', 'something rounded or forming a roundish lump', 'a head or top'; but these are intricately interwoven in individual senses. Thus *cob* = 'cob-nut', can hardly be separated from the notion of 'stout or big nut' on the one hand, or from that of 'fruit stone' on the other. So sense 1 appears sometimes to mean 'man at the *top*'.

It has been suggested that 'rounded head' is the radical notion, and that *cob* is a variant of COP; but the history of the latter does not favour this. In some of the senses under II,

cobble, *cobyll*, was an earlier equivalent, but these senses are closely connected with others which have no equivalents in *cobble*.]

cock (kɒk), *sb.*[1] Forms: 1–3 coc, 1 kok, cocc, 4–6 cok, coke, 4–5 cokke, 5 cokk, kocke, 5–7 cocke, 4– cock. [OE. *cocc*, *coc*, *kok*; cf. ON. *kokkr* (rare, according to Vigfusson only once in Edda), and F. *coq* (13th c. in Littré).

Though at home in English and French, not the general name either in Teutonic or Romanic; the latter has derivatives of L. *gallus*, the former of OTeut. **hanon-*: Goth. *hana*, OS. and OHG. *hano*, MDu. *hāne*, Du. *haan*, MHG. *han*, Ger. *hahn*, ON. *hani*, Sw., Da. *hane*, OE. *hana* which scarcely survived into ME. Phonetically, it is possible that *cocc* is:—OTeut. **kukko-*, from same root as CHICKEN *sb.*[1] (*eukino-*) viz. **keuk-*, *kuk-*. But its frequent early spelling in OE. with *k* (*kok*, *kokke*, etc., 4 times out of 5 in *Gregory's Past.*) looks rather as if it were considered foreign; for *k* is rare, except in foreign words. Also its use in one (later mixed) text of the Salic Law, vii. 6 (MSS. of 8–9th c.), 'si quis coccum aut gallinam furaverit' where other MSS. have *gallum*, and the Malberg glosses have *annas*, *cannas* for *channas* = original Teut. *han-*, rather favours its being Romanic. In any case, this shows *coccus* in the Latin of Northern Gaul, a century before the earliest known English instances. (Kilian 1577 has in Du. 'kocke *vetus* = haen', but the status of this is uncertain.) Wherever the name arose, it was prob. echoic: cf. sense 4.]

IV. Technical applications. [The connexion of some of these with this word is doubtful.]

12. a. A spout or short pipe serving as a channel for passing liquids through, and having an appliance for regulating or stopping the flow; a tap.

The origin of the name in this sense is not very clear: the resemblance of some stop-cocks to a cock's head with its comb, readily suggests itself; but some of the earlier quotations seem to imply that the power of closing the 'cock' was no essential feature, i.e. that a *cock* was not necessarily a *stop-cock*, but that the word simply meant a short spout for the emission of fluid; in others it appears to be = nozzle or mouthpiece. But in German, *hahn* has been used in the same sense for an equally long period, and an example of 1503 in Grimm has 'wenn es (ein kind) einen hän ufgewint, so louft der wein aller aus' (if the child turns a cock, all the wine runs out), clearly referring to a stop-cock.

cock (kɒk), *sb.*[2] Also 5 cok, 5-6 cocke. [First known in 15th c. Agrees in form and sense with dial. Ger. *kocke* masc. heap of hay, also of dung; Norw. *kok* m. heap in general, *esp.* of dung, but also still more generally 'lump': cf. ON. *kökkr* lump (*snæ-kökkr* snow-ball), Sw. *koka* fem. clod, clot. It is uncertain whether the narrower or the wider sense is the primitive: see Grimm s.v. (Connexion with the stem of Ger. *kug-el*, Du. *kog-el* 'ball', has been suggested.)

In the *Dictionnaire du Patois Normand, départem. de l'Eure* (1879) it is said, haycocks are generally called *villottes*; but about Berville (a little south of Rouen) a *villotte* of the smallest size, in which the hay is put up the first day, is called *une coque*, from its resemblance to the rounded shape of an egg-shell (*coque*). This may be the same word: the derivation offered is, of course, questionable.]

The *Vocab. della Crusca* has It. *cocca* 'a kind of ship, no longer in use, which had the prow and the poop much raised, with a single mast, and a square sail'; dim. *cocchetta*. Johnson (copied in later Dicts.) has the sense 'The notch of an arrow', which he probably found in Ainsworth's *Thesaurus* (1746——) 'The cock of an arrow, *Sagittæ crena*'. No evidence has been found for such a sense: it appears to be an etymological figment founded on Skinner's conjecture that 'cock of a gun' (COCK *sb.*[1] 13) was a term originally proper to Archery, and identical with It. *cocca* 'the nocke of an arrow' (Florio).]

cock (kɒk), *v.*[1] Formerly also cokke. [Here are included a number of separate uses, which appear all to be derived, in one way or another, from the name of the fowl. Even this derivation, however, is somewhat doubtful for the earliest sense, which has been conjecturally compared with Irish *cog-aim* 'I war, I make war', stem in OIr. *coc-*.]

But the first appearance of the word is in Rabelais, in the phrase *bonnet à la coquarde*, explained by Cotgrave (1611) as 'a Spanish cap, or fashion of bonnet vsed by the most substantiall men of yore..also, any bonnet, or cap, worne proudly, or peartly on th' one side'. Here *coquarde* appears to be the fem. of *coquard* adj. 'foolishly proud, saucy, malapert', as sb. 'a malapert coxcomb' (Cotgr.).]

A ribbon, knot of ribbons, rosette, or the like, worn in the hat as a badge of office or party, or as part of a livery dress.

The cockade worn in the hat by coachmen and livery servants of persons serving under the Crown, is a rosette of black leather, originally the distinctive badge of the House of Hanover, as the *White Cockade* was of the House of Stuart and its adherents.

cock-a-hoop. Also 6–7 cock on (the) hoope, (hope, houpe), 7 cock in hoope, 9 cock-a-whoop. [A phrase of doubtful origin, the history of which has been further obscured by subsequent attempts, explicit or implicit to analyse it.

Blount, *Glossographia* (1670), says '*Cock-on-hoop*; our Ancestors call'd that the *Cock* which we call a Spigget, or perhaps they used such *Cocks* in their vessels, as are still retained in water-pipes; the *Cock* being taken out, and laid on the *hoop* of the vessel, they used to drink up the ale as it ran out without intermission (in Staffordshire, now call'd Strunning a barrel of Ale) and then they were *Cock-on-Hoop*, i.e. at the height of mirth and jollity; a saying still retained'. This account fits the use of the phrase in the 16th c.; but it has more the appearance of an inference from the phrase itself, than of an independent statement of historical facts. For we have no clear evidence that 'cock' ever meant a spigot, and even if it did, the use of the 'hoop' of the cask as a place on which to lay it, seems to require further elucidation. The matter is perplexed by the occurrence of a 'hoop' and of figures 'on the Hoop' in tavern-signs from a much earlier date. Thus the 'George on the Hoop' is said by Hotten and Larwood *Hist. Signboards* (ed. 3) 503, to be mentioned in Clause-Roll 43 Edw. III, and later are found the 'Hart', 'Swan', 'Eagle', 'Falcon', 'Cock', 'Hen' 'on the Hoop', also the 'Crown', 'Bunch of Grapes', 'Mitre', 'Angel', 'Bell', each 'on the Hoop'. Some of these signs still exist; but it is difficult to see what bearing they have on the phrase as originally used, or how the 'Cock on the Hoop' as a sign should have given rise to a phrase, more than any of the other devices similarly found 'on the Hoop'; still more is it difficult to imagine how this cock could be set on or taken off the 'Hoop' in connexion with a drinking bout. Equal difficulty attends various other suggested explanations of 'hoop', none of which affords the slightest clue to the 16th c. use.

Since the 17th c. 'cock' has been generally identified with the live fowl, which has led to changes both in the grammatical construction and use of the phrase; in accordance with this also, 'hoop' has been vaguely referred to F. *huppe* tufted crest, (a guess of Phillips), and identified with 'whoop', as in *war-whoop*; these are merely popular etymologies, but they have affected the use of *cock-a-hoop* by persons who believed in them. The following passages illustrate these remarks.

Grimm suggested connexion with Ger. *kuchen* cake, 'because the houses there were covered with cakes'; cf. quot. 1305. cockatrice ('kɒkətraɪs, -trɪs). Forms: 4–7 coc-, cok-, 5– cockatrice; also 4–5 koc-, kokatrice, 5 cocatryse, coc-, cock-, cokautrice, 5–6 cokatryce, 6 cockeatrice, coccatrice, -trise, cockatryce, -tryse, 7 cockatrise. [ME. *cocatris*, *-ice*, a. OF. *cocatris* (also *coc-*, *coqu-*, *kok-*, *cauc-*, *chocatrix*, *-atriz*, *-atris*, *caucatri*, *cocastris*, *qualquetrix*) masc., corresp. to Pr. *calcatriz*, It. *calcatrice* (1266) fem., repr. L. **calcātrix*, *calcātrīcem* (cf. *caucatrices*, in Du Cange), app. a mediæval rendering of Gr. *ἰχνεύμων* ichneumon. This last (= *ἰχνευτής*) meant literally 'tracker, tracer out, hunter out', f. *ἰχνεύ-ειν* to track, trace out, hunt out, f. *ἴχνος* track, footstep. L. *calcātrix* is fem. agent-sb. of *calcāre*, orig. 'to tread', in med.L. 'to tread on the heels of, track, trace out' (f. *calx*, *calcem* heel). Thus *calcātrix* came to render *ichneumon*. (Prof. Thor Sundby, *Brunetto Latini's Levnet og Skrifter*, Kjöbenhavn, 1869, p. 142–4.) In OF. the word was partially popularized, as seen by the phonetic change of the original *calc-* through *caulc-* to *cauc-*, *coc-*, and *chauc-*, *choc-*. (In Sp. it occurs only as adopted from Fr., viz. *cocatriz* (Nebrija 1512), *cocadriz* (Minsheu), *cocotriz* later dicts.)

The sense-history of this word is exceedingly curious. The Ichneumon, an Egyptian quadruped, said to devour reptiles and crocodiles' eggs (which it searches for in the sand), is called by Pliny VIII. 24 (35) §88 sq., the mortal enemy of the aspis and the crocodile. As to the latter, he tells that when the crocodile is asleep or dozing with its jaws open, the ichneumon darts down its throat, and destroys it by gnawing through its belly; a tale originating, partly at least, in the habits of the bird *trochilus*, as mentioned by Herodotus and subsequent Greek writers, and repeated in many forms by later compilers. From an early period, Western writers entertained the notion that this ichneumon was amphibious or aquatic; the immediate followers of Pliny appear to have identified it with the Otter (in Gr. *ἐνυδρίς*). Pliny's tale is repeated by Solinus (flor. *c* 260) *Collectanea* xxxii. 25 (ed. Mommsen 160), and Isidore (*a* 640) *Orig.* XII. ii. 36: in the text of Solinus known to Ammianus Marcellinus (*c* 400), the animal is called '*enhydros*, the second kind of the ichneumons (enhydros alterum ichneumonum genus)'; while Isidore appears to make two distinct animals, the Ichneumon which 'serpentes insequitur..adversus aspidem pugnat', and the Enhydros 'a little beast so called because it lives in the water, and mostly in the Nile (Enydros bestiola, ex eo vocata, quod in aquis versetur, et maxime in Nilo)'. But the Gr. *ἐνυδρίς* was not only the *otter*, but also a *water-snake* = *hydrus*; and the latter was the only sense in which *enhydris* had been used by Pliny. Later compilers took this to be the sense of *enhydrus*, *-os*, in Solinus and Isidore, and the crocodile's enemy was now described as a 'water-snake' or 'fish'. Thus it appears in Albertus Magnus (1193–1280) *De Animalibus* xxv. (VII. 669) as 'hidra vel hydrus serpens omnium serpentum pulcherrimus..Apparet autem in Nilo flumine, et quum crocodilus dormit', etc., as in Pliny. Meanwhile also the latinized name *calcatrix* comes into view. It is found, along with the transformed description, in the version of the story given (*c* 1263) by Brunetto Latini in *Li Livre dou Tresor* 185 (ed. Chabaille), where it is said 'then comes another fish, which is named *hydrus*, that is *cocatris*, and enters within his body (lors vient un autres poissons, qui a nom ydre, ce est cocatris [*v.r.* qualquetrix] et li entre dedans le cors)'; further 'and you must know that cokatrix, albeit he is born in the water, and within the Nile, he is not at all a fish, but is a water-serpent (Et sachiez que cokatrix jà soit ce qu'il naist en l'aigue, et dedans le Nile, il n'est mie peisson, ainz est serpens d'aigue)'. It has been suggested that, in this, the ichneumon was confounded with another reputed enemy of the crocodile, the *varanus*, or Monitor of the Nile, which is really a reptile. The *cocatris* = *ichneumon* = *enhydris* = *hydrus*, having thus been transformed into an aquatic reptile, living in the Nile, other writers proceeded to identify it with the crocodile itself. The *Bestiaire divin* of Guillaume le Normand (*c* 1210) makes *coquatrix* the crocodile, and *ydrus* his enemy: and in the *Bestiaire* of Richard de Fournival (*c* 1250) we have 'Vous m'avez fait mention en votre requeste d'un chocatrix, qui est apelez par son droit non cocodrilles'—'you have mentioned a *chocatrix*, but he is called by his right name *crocodile*'. And in later French, as well as in other Romanic langs., 'crocodile' became, at least, one of the recognized meanings of *cocatrix*. This confusion may have been helped in some instances by the fact that *cocodrille*, one of the commonest of the early forms of *crocodile* (see that word), had an initial similarity to *cocatrix*, and may have been taken by the ignorant as only another form of the name.

In English the confusion with *crocodile* hardly appears, except once or twice as a literalism of translation. Here, *cocatrice* appears from the first as the equivalent of L. *basiliscus*, or *regulus* = BASILISK. It was thus used by Trevisa in his translation of Bartholomæus Anglicus *De Proprietatibus Rerum* to render *basiliscus*, and, what was more important, by Wyclif and his followers to translate *regulus* (Isa. xi. 8, xiv. 29, lix. 5), and *basiliscus* (Ps. xc[i]. 13) of the Vulgate. In the former of these (also in Jer. viii. 17) it was retained in the 16–17th c. versions; but in the revised text of 1885, has been changed to *basilisk*. The history of this further transition of sense is still obscure; but it is to be noticed that *cocatrice* translates F. *basilicoc*, and that *coc* is app. a connecting link. But some traditional notions of the ichneumon as the enemy of the *aspis* (which appeared later in the well-known statement that the only animal which could kill the basilisk was the *mustela* or weasel) were probably contributory, as well as the mediæval confusion, under the name *regulus*, of the basilisk (*rex serpentium*) with the trochilus (*rex avium*, OF. *roytelet*, in mod.F. *roitelet* 'wren'): cf. Aldrovandi *Opera* (Bologna) X. 361.

Further etymological speculation, in France or England, working upon the syllable *coc*, *coq*, in *basili-coc*, *coc-atris*, probably also associating the crested basilisk with the crested bird, and mingling with it vague notions of the crocodile's eggs, buried in the sand, and producing a tiny reptile, originated the well-known notion of 'a serpent hatched by a venemous reptile from a cock's (i.e. *basili-cock's* or *cok-adrill's*) egg', embodied in the heraldic monster, half cock, half serpent. As told of the basilisk, this appears already in Albertus Magnus (who however disbelieves it), in Bartholomæus Anglicus, etc. (See Thor Sundby, above cited; also Solinus, with Commentary, ed. Salmasius 1689, Cahier & Martin *Mélanges d'Archéologie* II. 213.)]

1. A serpent, identified with the BASILISK, fabulously said to kill by its mere glance, and to be hatched from a cock's egg.

Used in Bible versions to translate L. *basiliscus*, *regulus*, where the LXX have *βασιλίσκος*, *ἀσπίς*.

Cf. however the 16th c. equivalent COCKLE *v.*[3], which is identical in form and sense with a 16th c. Cf. also obs. F. *coqueliner* (*un enfant*) to dandle, cocker, pamper, a child (Cotgr.). The Eng. *cocker* and *cockle* have the form of iterative diminutives of COCK *v.*[5], and the whole were prob. derivatives of COCK *sb.*[1], with the notion 'to make a nestle-cock, chick (L. *pullus*), or darling of'. Cf. etymological note to COCKNEY.

The Ir. and Gaelic *cogal*, used in the versions of Matt. xiii. for 'cockle, tares', is merely the English word borrowed (prob. in the older form **cocal*, though it is not known in O. or M.Irish).]

1. The name of a plant: now, and prob. from OE. times, applied to *Lychnis* (or *Agrostemma*) *Githago*, a caryophyllaceous plant, with handsome reddish-purple flowers succeeded by capsules of numerous black seeds, which grows in cornfields, especially among wheat. Also called *corn cockle*.

Known to early herbalists as *Nigella* or *Nigellastrum*, F. *nielle*. *Nigella* (dim. of L. *nigra* black, referring to the black seeds) was app. originally applied to a ranunculaceous plant, *Nigella arvensis* (or one of its congeners), a field-weed of southern regions; but in northern France and Britain, where this plant was unknown, the name was transferred to *Githago*, the black-seeded corn-weed of these regions.

2. Applied from OE. times to render or represent the *zizania* of the Vulgate in Matt. xiii, or the *lolium* with which Latin writers identified this.

Recent investigation has apparently settled that the ζιζάνιον, pl. -ια, of the N.T., *zizania* and *lolium* of Latin writers, was the grass *Lolium temulentum* or Darnel, a prevalent weed in Mediterranean and Levantine regions (cf. Stanley *Sinai & Palestine* 426, Tristram *Nat. Hist. Bible* 487), which is very prone to be affected with *Ergot*, and in the ergotized condition is deleterious. The translation of these words by *coccel*, *cockle*, in English was (like the later erroneous rendering *tares*) due in the first instance to ignorance as to the plant meant by *zizania* or *lolium*; but it led to the further error of some scientific writers who, knowing *lolium* to be darnel, still called it 'cockle'.

[The derivation suggested above satisfies the form: *ey, ay* (*ai*), are regular ME. forms of *egg*, riming with the same words (*day*, etc.) as *cokenay* itself; *coken* genitive pl. is as in *clerken coueitise, P. Pl.* B. iv. 119, and in many similar instances; the use of the gen. plural is as in Ger. *hühnerei*, fowls' egg, *hahnenei* cocks' egg. The stress on *ay* retained in verse to 16th c., and supported by Minsheu's *cock neigh*, also accords with this composition of the word.

Of sense 1, the meaning appears to be established by the first quot.; the constituents of a COLLOP (q.v.) were precisely bacon and an egg. This meaning also completely explains the quot. from Heywood; that from the *Tournament* is perhaps (as already suggested by Wright) satirical or jocose. The matter appears to be clinched by the quot. from Florio for *cockan-egs*. To account for the appellation, we might suppose *coken-ay* to be originally a child's name for an egg (cf. what is said of *coco* below); but as *cocks' eggs* and the equivalent Ger. *hahneneier* are at the present day applied in popular or dialect speech to small or malformed eggs (formerly imagined to be laid by the cock), it is not improbable that this was originally the specific sense of *cokenay*. The old notion that such eggs produced a serpent (see COCKATRICE) is well known; but no trace of this appears in the popular use of *cokenay*.

The application of either a child's word for an egg, or of the name of a small or mis-shapen egg, as a humorous or derisive appellation for 'a child sucking long', a 'nestle-cock', a 'milk sop', obviously explains itself; and the sense-development from 2 onward is clear and certain. A valuable contribution to the history of these senses is made by H. H. S. Croft, in the Glossary to his ed. (1883) of Elyot's *Gouernour*.

An apparent parallel is the French word *coco* 'a child's name for an egg', also a term of endearment applied to children, and of derision applied to men: *mon petit coco, quel grand coco! Coco*, considered by Littré a deriv. of *coq*, was app. the source of *coconellus* (dim. of **coco, cocōnem*) given in the Promp. Parv., with *cucunellus*, as med.L. translations of *cokenay*, and stated to be 'ficta et derisorie dicta', 'derisorie ficta et inventa'. And *coconellus*, in turn, appears to be the origin of the 16th c. Eng. COCKNEL, given above, as an exact equivalent of *cockney*, senses 2, 4. On F. *coco* was formed the verb *coqueliner* 'to dandle, cocker, fedle, pamper, make a [cockney or] wanton of (a child)', just as *dodo* a word like Eng. 'by-by' or 'ba-ba', sung to lull a child to sleep, gave *dodeliner* to perform this action. It is to be noted also that, from the earliest times, *cokenay* 2 was constantly associated with the vb. *coker* COCKER, both in use (see quots. in 2), and in L. and Fr. explanations e.g. 'cokeryn, *carifoveo*; cokenay, *carifotus*', Promp. Parv., 'I coker *je mignotte*; I bring up like a cocknaye *je mignotte*' Palsgr. If *cocker* was, as it appears to be, a derivative of *cock*, this association was natural and obvious.]

cock-sure (kɒk'ʃʊə(r)), *a.* (*adv.*) [According to the regular force of similar formations, e.g. *stone-deaf, clay-cold, dog-sick, dirt-cheap, coal-black*, etc., the sense ought to be 'as sure as a cock'. The conjecture that there is some allusion to *cockish, cocky*, with reference to 'pert self-confidence', being founded upon the latest sense, which is only a modern development, is not historically tenable. The word was originally perfectly dignified, and habitually used in the most solemn connexions. And, in early use, the sureness in question was *objective*, i.e. 'as secure, safe, certain, trustworthy, reliable, etc., as can be': this makes it possible that the original reference may have been to the security or certainty of the action of a cock or tap in preventing the escape of liquor, or perhaps of a cock with a removable turning-key (if these go far enough back) in leaving the contents of a tun secure from interference.

The notion 'as sure as a cock is to crow in the morning', has also been suggested. It might suit sense 2, but not sense 1.]

coco, cocoa ('kəʊkəʊ). Forms: *α.* 6 cocus, 6–7 cocos; *β.* 6–7 coquo, (6 caco, coeco), 6– coco; *γ.* 7 coquer, cocar, cocker, 7–8 cokar, 7– coker; *δ.* 8–9 cocoa. [a. Pg. and Sp. *coco*; in 16th c. L. *cocus.* The early writers, from Cosmas 545 to the 15th c., knew it only as the *Indian nut* or 'nut of India'; *coquos* (plural) is quoted first from the *Roteiro de Vasco da Gama* (Portuguese, 1498–9); Barbosa 1516 has (Pg.) *quoquos*; Pigafetta 1519 has (It.) *coche* pl. of *coca*; Oviedo 1526, Barros 1553, Garcia 1563, and Acosta 1578 have *coco*; Correa 1561 *coquo.*

The Portuguese and Spanish authors of the 16th c. agree in identifying the word with Pg. and Sp. *coco* 'grinning face, grin, grimace', also 'bugbear, scarecrow', cognate with *cocar* 'to grin, make a grimace'; the name being said to refer to the face-like appearance of the base of the shell, with its three holes. Historical evidence favours the European origin of the name, for there is nothing similar in any of the languages of India, where the Portuguese first found the fruit; and indeed Barbosa, Barros, and Garcia, in mentioning the Malayalam name *tenga*, and Canarese *narle*, expressly say '*we* call these fruits *quoquos*', '*our people* have given it the name of *coco*', 'that which *we* call *coco*, and the Malabars *temga*'.

In Eng. the latinized form *cocus*, afterwards (as in Bot. Latin) *cocos*, was at first used, both for sing. and plural. Towards the close of the 16th c. *coquo*, *coco*, as 'the Portingalls cal this fruit' (Linschoten), began to be used, with pl. *cocos*, *cocoes*. *Coco* remained the established spelling in the 18th c., till the publication of Dr. Johnson's Dictionary, in which the article *Coco* was (app. by some accident, for Johnson in his own writings used *coco*, pl. *cocoes*) run together with the article *Cocoa* (= *Cacao*); this gave currency to a confusion between the two words which still prevails, although careful writers have never ceased to use the correct form *coco*.

Another spelling, *coker*, has been used, with various modifications since about 1620 (Purchas has *cokers*, Burton *coquer-nuts*); it appears to be from 17th c. Dutch *koker-noot*, and has long been in commercial use at the port of London to avoid the ambiguity of *cocoa*.

The Greek words κοῦκι and κόϊξ applied by Theophrastus, and, after him, by Pliny (*cūci*, *coix*), to certain palmaceous trees, have both been suggested as sources of the name, but without any ground, except their distant resemblance to *coco*. Connexion with Sp. *coca*, F. *coche*, and the family of L. *concha* shell is also philologically untenable.]

5. double coco-nut, in Fr. *coco-de-mer*, *coco-des-Maldives*, the immense woody nut of a gigantic palm *Lodoicea sechellarum*, found native only on the small islands, Praslin and Curieuse, of the Seychelles group. The fruit weighs 40 or 50 pounds, is covered with a thick fibrous husk, and contains from one to three stones, or 'nuts', about 28 inches long, covered with excessively hard and thick black shells, each divided half-way down into two lobes, whence the name.

Before the discovery of these islands in 1743, the source of these nuts, which were often found floating on the Indian Ocean, or thrown up on the shores of the Maldive Islands, was enveloped in mystery and fable.

codling[2] ('kɒdlɪŋ), **codlin** ('kɒdlɪn). Forms: 5 querdlyng, qwerdelyng, 6 codlyng, 6-7 quodling(e, quadling, 7- codling, codlin. [The later forms *quodling*, *codling*, are perh. corruptions of the earlier *querdling*. The latter is explained in the Promptorium as *duracenum*, app. L. *dūracinus*, *-um* 'hard-berried, hard', orig. said of the grape, hence of other fruits, as peaches, cherries, etc. Assuming that *querdling* had a meaning corresponding to this, it has been suggested that it might be a derivative of ME. *quert* 'sound'; though this is not very satisfactory either in form or in sense.

Palgrave's explanation *pomme cuite*, and Skinner's *pomum coctile*, together with the very frequent references in the 17th c. to the coddling of apples or pippins (see CODDLE *v.*[1]), and the frequent spelling of the latter with *qu-*, seem to show that the two words were thought to be connected. But the form *querdling*, the late appearance of the verb *coddle*, and want of early examples of a descriptive phrase 'coddling apple', all tend to indicate that this association was non-original and incidental.]

1. a. A variety of apple, in shape elongated and rather tapering towards the eye, having several modern sub-varieties, as Kentish Codling, Keswick Codling, etc.

From the beginning the name seems to have been applied to a hard kind of apple, not suitable to be eaten raw; hence to any immature or half-grown apple. In the beginning of the 17th c. it was applied to a variety suitable to be cooked while still unripe; but the peculiar codling shape appears to have determined the modern application.

(The alleged sense 'green peas' in Halliwell appears to be founded solely upon a conjecture of Gifford's on the following passage, and that in *Sun's Darling* (CODLING[2] 1 c) for 'hot codlings', which he also took for 'peas'. If 'coddled' or roasted peas (CODDLE *v.*[1] 2) were ever called *coddlings*, this may be the sense here; but evidence is wanting. codon ('kəʊdɒn). [f. COD(E *v.* 1 d + -ON.] The smallest group of nucleotides in a polynucleotide that determines which amino-acid shall be inserted at any given position in a polypeptide chain; it is found experimentally to be a sequence of three consecutive nucleotides.
1963 F. H. C. CRICK in *Progr. in Nucleic Acid Res.* I. 166 *The Codon.* This is a group of bases that code for one amino acid. In simple codes a codon is a fixed number of consecutive bases, e.g., in a 'triplet' code it is three consecutive bases, but it is possible to conceive codes in which, for example, some codons consist of two bases and others of three. Again it is not certain that the bases making up a codon are adjacent on the polynucleotide chain. **1966** *New Scientist* 12 May 348/3 The transfer-RNA attaches itself to its own amino acid and, in some fashion, couples it to the right codon on the messenger-RNA inside the ribosome. *Ibid.* 11 Aug. 322/2 The amino acid molecules do not attach themselves directly to the base-triplets, or codons.

As the word has had, in later times, a bad flavour, suggesting the application of force as a remedy, or its employment against the general sense of a community, it is now usually avoided by those who approve of the action in question.

[ad. Arab. *qahwah*, in Turkish pronounced *kahveh*, the name of the infusion or beverage; said by Arab lexicographers to have originally meant 'wine' or some kind of wine, and to be a derivative of a vb.-root *qahiya* 'to have no appetite.' Some have conjectured that it is a foreign, perh. African, word disguised, and have thought it connected with the name of *Kaffa* in the south Abyssinian highlands, where the plant appears to be native. But of this there is no evidence, and the name *qahwah* is not given to the berry or plant, which is called *bunn*, the native name in Shoa being *būn*.

The European langs. generally appear to have got the name from Turkish *kahveh*, about 1600, perh. through It. *caffè*; cf. F., Sp., Pg. *café*, Ger. *kaffee*, Da., Sw. *kaffe*. The Eng. *coffee*, Du. *koffie*, earlier Ger. *coffee*, *koffee*, Russ. *kophe*, *kopheĭ*, have *o*, app. representing earlier *au* from *ahw* or *ahv*.]

†**cog,** *sb.*[1] *Obs.* (exc. *Hist.*) Forms: 4 coge, kogge, 4-6 cogge, 4- cog. [ME. *cogge*, *kogge* (14th c.), corresponds in form and meaning alike to OF. *cogue*, (*coge*, *koge*, *cogghe*, *guogue*), also *coque*, a kind of ship, *esp.* 'ship of war' (Godefroy), and to MLG. *kogge* m. f., MDu. *cogghe* (Du. *cogge*, *cog* f.), MHG. *kocke*, 15th c. G. *kock* (OHG. *coccho* m.). With the latter cf. OSw. *kogger* m., Da. *kogge*, *kog* small vessel without a keel, Sw. dial. *kåg*, *kåk* small single-masted sail-boat (Rietz), ONorw. *kuggr* m. larger merchant-ship, *esp.* of the Hanse, Icel. *kuggi* small vessel.

Teutonic etymologists consider these words to be native, going back to OTeut. types **kuggon-*, **kukkon-*. The OF. forms on the other hand are usually taken as cognate with Pr. *coca*, *coqua*, Sp. *coca*, obs. It. *cocca*, 'a kind of ship no longer in use, which had the prow and the poop much raised, with a single mast, and a square sail' (Della Crusca), derived by Diez and others from a L. type **coccha*, by-form of *concha* lit. 'shell', also, in late or med.L., a species of boat or ship. The relations between the Teutonic and the Romanic, and esp. the OF., words are uncertain. The probability is that the ME. word was from French rather than LG.: like the Fr. it interchanged at an early date with *cocke*, COCK[3], which afterwards was differentiated, and used only in sense of the Fr. dim. *coquet* cock-boat.]

1. a. One of a series of teeth or similar projections on the circumference of a wheel, or the side of a bar, etc., which, by engaging with corresponding projections on another wheel, etc., transmit or receive motion.

Cogs are either separate wooden pieces attached by mortices and the like, or are cut out of the substance of the wheel, or cast in one with it. The name was probably first given to the wooden pins inserted sideways into the rim of a wheel, which caught the rungs or trundles of a lantern-wheel; hence *cog and round*, a mechanical arrangement of this type. *hunting* cog: in cogged wheels which have a certain proportion to each other, an extra cog given to the larger, by which there is secured a continuous change of cogs engaging with each other and consequently equal wear.

cog, *v.*[2] *Carpentry.* [cf. COCK *v.*[3] which appears to be the original form of this word, the present form being app. due to association with the *cogs* of a wheel, and with COG *v.*[1], to which this has a superficial appearance of relationship of sense.]

[This vb. and the corresponding COG *sb.*[4] appear together in 1532, as 'Ruffians' terms' of dice-play; whence they passed into general use in various transferred senses. As in other cant terms, the origin has not been preserved; but the persistent notion is that of dishonest or fraudulent play, cheating.]

1. *intr.* (*Dicing.*) To practise certain tricks in throwing dice.

From contextual evidence it would seem that 'cogging' generally designated some sleight of hand, made use of to control the falling of a die; occasionally it may mean the substitution of a false die for the true one. The notion that it meant 'to load the dice' appears to be a mistake of modern dictionaries, which has, however, strongly influenced the use of the word by modern novelists, etc.; cf. esp. COGGED

[ME., a. OF. *conis(s)ance*, *conus(s)ance*, var. of *conois(s)ance*, f. *conoiss-ant* pr. pple. of *conoistre* to know + -ANCE, answering to a L. type **cognōscentia* (of common Romanic standing: cf. It. *conoscenza*, Pr. *conoissenza*, Cat. *conexensa*, OSp. *conocencia*). From the 13th c., and esp. after the Renascence, the spelling was in Fr. often partially latinized as *cognoissance*, but the *g* was never pronounced (Palsgrave, 1530) and was entirely dropped after 1600. In Eng. the *g* appeared in 15th c., and has here gradually affected the pronunciation, though, in legal use, the older ('kɒnɪzəns) is still usual. (The spelling with *s* is etymological, but that with *z*, which accords with the pronunciation, has long prevailed.)

Lat. *cognōscĕre* gave regularly (through *cognocs're*, *co(g)nois're*), OF. *conoistre*, also written *conuistre*. In the pr. pple. *conois(s)ant*, *conuisant* (:—*cognōscent-em*), and in analogous forms, pre-tonic *oi* was liable to be weakened to *e*, and *i*, giving *cones(s)ant*, *conis(s)ant*, and *ui* to *u* giving *conusant*, whence the Anglo Fr. and ME. forms so spelt. In mod.F. *connoissant* has long been pronounced *connessant*, and is now written *connaissant*. The pa. pple *connu*, OF. *coneü*, represents a L. type *cognōvūtum* f. *cognōvi*.]

cokar, cokar-nut: see COCO.

coke (kəʊk), *sb.*[1] Also 7-9 coak, 8 coake, cowke. [Known only from the 17th c., when classed by Ray as a North-country word. Possibly the same as the northern COLK *sb.* (also spelt *coke*) a core, *coke* being viewed as the hard core of the coal left after other parts have been consumed. The early use of the word as an individual name with pl. *coaks, cokes*, would agree with this. (Thence also mod.F. *coke* pl. *cokes*.) Cf. for both sense and form, the following, which appears to combine the senses of *core* and *cinder*.

1878 *Cumbrld. Gloss.* (E.D.S.), *Cowk*, the core. 'It's badly burnt lime, it's nought but cowks.']

col, obs. f. COAL, COLE, COOL; also, an apothecary's abbreviation for COLIANDER.

col-, assimilated form of the prefix COM-, CON-, before *l*; not used in the earliest L., which had *con-*, but afterwards regular, and so in modern Romanic and Eng., as L. *conloquium, colloquium*, COLLOQUY. For the general signification, see COM-.

As in the case of the parallel forms *com-* and *con-*, Latin words in *coll-* were in Pr., Sp., OFr., and early ME., reduced to *col-*, as in L. *collecta*, OF. *coleite*, ME. *colet*; so *colacion, colege*. With the revival of learning this was altered back to *coll-*; but only one *l* is sounded, and the unaccented syllable is apt to remain (kəʊ-) or (kə-); there is, however, usually an effort to show the effect of the *l* upon the vowel, when rhetorical or distinctive stress is put on the first syllable: i.e., the full (kɒl-) may be developed under stress.

cold-finch. *Ornith.* A book-name of the Pied Fly-catcher, *Muscicapa atricapilla*.

A term which originated in some error. Expressly given by Willughby and Ray as the *German* name of a bird, of which a specimen was sent to the former, and described by him. There is no such name in German; and Willughby's description corresponds to no known bird. Its application to the Pied Fly-catcher appears to begin in 1741–3 with Edwards, who remarks, however, that Willughby's description did not agree. From him it has been handed down in books as an *English* name, and in some localities it is said to be now popularly known.
